

Investment Objective and Strategy

The investment objective of the Fund is to provide long-term capital appreciation by primarily investing in listed equities with a China focus. There can be no assurance that the Fund will achieve its investment objective.

The Fund seeks to achieve its objective primarily through exposure to companies established in China or those which, whilst established outside China, derive a significant proportion of their revenue or profits from business related to China. The Fund makes investments into companies that, in the Manager's opinion, have been undervalued by the market. There is no restriction on market capitalizations or industries in relation to the equity securities in which the Fund may invest.

Under normal circumstances, the asset allocation strategy is that at least 70% of the Fund's Net Asset Value will be invested in stocks of companies established in China or those which, whilst established outside China, derive a significant proportion of their revenue or profits from business related to China (including but not limited to investment in depositary receipts such as American Depositary Receipts), and, subject to an overall upper limit on onshore PRC exposure of 20% of the Fund's Net Asset Value, up to 20% of the Fund's Net Asset Value will be invested directly or indirectly in stocks listed in Shanghai (including stocks listed on the Sci-Tech Innovation Board (the "STAR Board")) and/or Shenzhen (including stocks in the ChiNext market and/or stocks listed on the Small and Medium Enterprise Board (the "SME Board")).

Important Note:

1. CFund – China Equity (the "Fund") invests in (a) stocks listed in China (including Hong Kong, Shanghai and/or Shenzhen) or (b) equity securities listed in Hong Kong of companies established in China or its principal business is located in China or its current majority of income or earnings derived from China. This may result in a higher volatility than a broad-based fund.

2. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting Hong Kong and China markets.

3. The Fund may invest in derivatives. The use of derivatives exposes the Fund to additional risks, including volatility risk, liquidity risk and counterparty/credit risk and credit risk regarding access product issuer.

4. The Fund may invest into other funds. There will be additional costs involved.

5. The Fund can invest in China A-shares through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programme. These programmes are subject to regulatory risks and other risks such as quota limits, volatility risks and settlements risks.

6. The Fund does not apply any equalisation in the calculation of performance fee, therefore there may be circumstances where an investor may either be advantaged or disadvantaged as a result of the performance fee calculation methodology. Specifically, in the event of the Fund's outperformance, an investor may be subject to a performance fee regardless of whether a loss in investment capital has been suffered by the investor.

7. Investments involve risks. The Fund, like most funds, does not provide any guarantees. You have the opportunity to lose some or all of your investment. Investment decisions should not be made solely on the basis of this promotional material. Please refer to the explanatory memorandum for information before investing to understand the risk factors and other information. Past performance is not indicative of future performance. If you have any questions, please contact your financial advisor and seek professional advice.

8. The Manager currently intends to make quarterly dividend distribution for the A Units HKD (Dist) class at its discretion. Dividends may be paid out of capital or effectively out of capital of the relevant Class and may result in an immediate reduction of the Net Asset Value per Unit of the Fund.

Fund Manager's Comment

Global markets have recovered to pre-"US Liberation Day" levels by May, driven by tariff de-escalation talks. Hong Kong's market sustains its April rebound, fueled by easing China-US tensions. Concerns over the US dollar's outlook have strengthened Asian currencies, sparking speculation of an unwind in dollar-based assets. Consequently, the HKMA has passively injected liquidity by selling HKD, lowering HIBOR rates and creating a favorable low-interest environment.

This liquidity supports underperforming sectors, such as Hong Kong property stocks. The AH premium underscores H-share strength, boosted by CATL's 2025 blockbuster IPO, supporting upcoming IPOs, including ADRs and A-shares. However, company earnings show no significant improvement. Deflationary pressures affect growth sectors like electric vehicles, where consumers seek discounts. Despite the tariff relief provides optimism, we'll monitor developments closely.

Geopolitical risks have heightened, particularly with tensions between Israel and Iran. However, markets remain optimistic about a potential de-escalation, provided no additional countries are involved. We remain cautiously positive on Hong Kong and China markets, bolstered by China's financial reforms and market stability. Our focus remains on growth-oriented companies with reasonable valuations to enhance the portfolio's efficiency.
